## <Cash Flows>

- Net cash provided by operating activities was 348.2 billion yen due to improvements in operating revenue, dividend income and working capital.
- Net cash used in investing activities was 161.9 billion yen due to the outflow of a capital expenditure in overseas businesses and acquisition of shares of equity method affiliates and others.
- As a result, free cash flow was an inflow of 186.3 billion yen.

## <Financial Position>

- Net interest-bearing debt increased 157.0 billion yen from the end of the previous fiscal year to 2,017.0 billion yen, mainly due to the Japanese yen depreciation and dividend payment,
as well as transferring cash and cash equivalents in the Gavilon's grain business to assets held-for-sale during the six-month period ended September 30 , 2022, despite the free cash inflow.
- Equity attributable to owners of the parent increased 627.4 billion yen from the end of the previous fiscal year to $2,869.6$ billion yen,
mainly as a result of increase in retained earnings by net profit accumulation and increase in foreign currency translation adjustments by Japanese yen depreciation.
- As a result, net DE ratio stood at 0.70 times, improved by 0.13 points from the end of the previous fiscal year
